a lifestyle guide as genuine and fun as Big Ang herself, the star of VH1's Mob Wives, called the show's "den mother" by the New York Times, serves up the hilarious and poignant wisdom she's learned while running her bar, raising her family, and dating made men. Big Ang has rules to live by for beauty, food, family, friendship, and more. Here she is... ON HER KILLER BOOBS: I was on vacation with my family in the Catskills when out of nowhere, this bat flies right into my chest and then falls splat on the ground. Turned out, he died on impact. ON FAMILY TRADITIONS: Every Sunday, we do a feast for fifteen to twenty-five people. Last week, we went through seventy-five meatballs. Even by my family's standards, that's a lot of balls. ON DIETING: Swearing off lasagna to lose weight? You might fit into smaller jeans. But you're still the same person"

HOBBIES: Would I rather cook for people or have sex? No hard-and-fast rule there.

But I will say this: Cooking is always satisfying.

From one-celled paramecium to giant blue whales, we all have internal clocks that regulate the rhythms we live by. In *The Living Clock*, John Palmer, one of the world's leading authorities on these rhythms, takes us on a tour of this broad and multifaceted subject, examining everything from glowing fruit flies to the best cures for jet lag. Palmer has a wonderful sense of humor and an eye for the startling fact. We learn that fiddler crabs--in a lab where there are no time nor tide cues--remain active when low tide would occur and motionless during high tide, the same pattern they follow in their natural habitat. (In fact, you can remove a crab's leg and the leg will keep a tidal rhythm as long as it's kept alive.)

Moreover, humans are subject to more than one hundred biological rhythms. Mental acuity peaks in the afternoon, for instance, and our blood pressure peaks at seven in the morning (when most heart attacks occur). The time of day you take medication can affect how well it works. And Palmer shows that when our clocks are thrown off kilter, trouble follows, especially for rotating shift workers--the Bhopal spill, the Chernobyl reactor explosion, and the Three Mile Island accident all happened when new crews began early-hour shifts. No one has discovered exactly how our internal clocks work--Palmer says a Nobel Prize awaits that lucky scientist--but they are no less fascinating for their inexplicable nature. Frequently amusing and always eye-opening, *The Living Clock* is a treat for everyone curious about the nature of life as well as anyone planning a long jet

I am a Russian-born American citizen and Jewish. I have been raised during the oppressive Soviet regime and fortunate enough to leave it behind. This political memoir is my contribution to show people the contrast between what I have experienced and what we are experiencing in the United States currently. AfterTastes and Tales from Russia (Forgive me for being anti Social...ism) is part memoirs, part political analysis and opinions. The point I try to make is simple, that socialism has never worked and I provide my childhood memories, experiences and analysis on why. AfterTastes and Tales from Russia is a book that will reach out to the people of all political spectrum and race. I provide examples on how the non-religious, atheist society may still be very

prejudiced and, in fact, more prejudiced than a free society. I want to help save this nation, so my book is as much from the heart as it is from my knowledge.
