This enables them to present the material in a contemporary manner that is easily relatable and understood by students. Relevant information on topics such as cardiovascular exercise, strength training, stretching, nutrition, weight management, stress management, substance abuse and addiction, and sexual health will start students on the path to developing a healthy mind and body, which can lead to a better quality of life. In addition to the 48 exercises demonstrating proper exercise technique, lab activities for each chapter will guide students in completing individual assessments, setting goals, and identifying the pros and cons of modifying their behavior. The labs may be assigned by instructors and tracked within HKPropel, and chapter quizzes (assessments) that are automatically graded may also be assigned to gauge student comprehension of the content. The primary goal of Fitness and Wellness: A Way of Life is to provide a personal, evidence-based tool to help students embrace living well. They will learn how to make healthy choices and positive behavior changes to lead and sustain healthier, happier, and more productive lives, now and in the future.
