Barron's Regents Exams and Answers: Geometry 2020 provides essential review for students taking the Geometry Regents, including actual exams administered for the course, thorough answer explanations, and comprehensive review of all topics. This edition features: Five actual, administered Regents exams so students can get familiar with the test Comprehensive review questions grouped by topic, to help refresh skills learned in class Thorough explanations for all answers Score analysis charts to help identify strengths and weaknesses Study tips and test-taking strategies All pertinent geometry topics are covered, such as basic angle and segment relationships (parallel lines, polygons, triangle relationships), constructions, transformations, triangle congruence and writing proofs, similarity and right triangle geometry, parallelograms, circles and arcs, coordinate geometry, and volume (modeling 3-D shapes in practical applications). Looking for additional practice and review? Check out Barron's Regents Geometry Power Pack 2020 two-volume set, which includes Let's Review Regents: Geometry 2020 in addition to the Regents Exams and Answers: Geometry book.

Barron's Regents Exams and Answers: Algebra II provides essential review for students taking the Algebra II (Common Core) exam, including actual exams administered for the course, thorough answer explanations, and comprehensive review of all topics. This edition features: Four actual, administered Regents exams so students can get familiar with the test Comprehensive review questions grouped by topic, to help refresh skills learned in class Thorough explanations for all answers Score analysis charts to help identify strengths and weaknesses Study tips and test-taking strategies All algebra II topics are covered, including Polynomial Equations, Rational Equations, Exponential and Logarithmic Equations, Systems of Equations with Three Variables, Functions, Sequences, and Probability. Looking for additional practice and review? Check out Barron's Algebra II Power Pack two-volume set, which includes Let's Review Algebra II in addition to the Regents Exams and Answers: Algebra II book.

These brand new books include the most up-to-date information on the Physics Regents Exam. Barron's Physics Power Pack will help students understand the material and get thoroughly prepared for their exams. Barron's Regents Exams and Answers: Physics and Barron's Let's Review Physics are available as a two-book set. Purchase of this two-book PowerPack gives buyers a savings of \$3.99 when compared to the prices of the books purchased separately.

Environmentalists worry about too much carbon dioxide, but what's too little? What if global financiers manipulated the global warming crisis to gain control over humanity's resources, freedoms, and population? What if someone with the financial and technical abilities decided mankind was a virus and used carbon dioxide trapping technology to plunge population levels by crashing life-essential CO2 to new lows? These are questions Anna Picard must face in The Carbon Trap, the first book in The Carbon Series. At the height of the global warming crisis, the United Nations attempts to control all carbon emissions, and authorizes a series of programs it deems necessary to save humanity. A progressive US government enthusiastically endorses the UN Carbon Trapping program, and to help pay for it, will impose carbon taxes, draconian regulations, and... it will secretly sell Alaska. Anna Picard is an amoral fixer, an employee of Agenda 21 member and global financier Alexis Swanson had trained to help recruit his corporate army and neutralize his enemies. It is her job to unleash a global hacker network to help destroy the carbon based industries and funnel insider-trading profits to Swanson. One of her recruits is Dr. Sven Johansson, a brilliant geneticist and President of Snath Biotechnology, who designs life forms to trap CO2. But Sven has more ambitious plans. At a UN conference in the Maldives held to impose draconian carbon regulations, not everyone is happy, some industrial executives realize data has been falsified. To protect her scheme, Anna frames one of the execs for murder. Her plans are complicated when she falls in love with Dr. Pete Heyward, the son of the man she framed for murder. Pete is a US Marine amputee who sees past her malevolent deeds and tries to rejuvenate the morality of her youth. After a series of genetically modified carbon trapping life forms is unleashed upon the Earth, Anna must confront the evils she helped unleash, and prevent an even bigger disaster from unfolding that would destroy most life on Earth. This is a high-tech ecological thriller that takes the reader from the Maldives, to the French Riviera, and the heartland of Texas. It introduces cutting edge technologies and concepts, used for the first time in a novel, that reveal striking implications for society.
