The old masters of chess dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Aagaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.

"Reveals a sensible way to rebuild public education and close the achievement gap for all students. Indeed, this is already happening in a most unlikely place: Union City, New Jersey, a poor, crowded Latino community just across the Hudson from Manhattan. Kirp explores the game-changing reasons behind Union City's successful schools, including quality early education, a word-soaked curriculum, and hands-on help for teachers. Improbable scholars offers a playbook for reform that will dramatically change our approach to reviving public education"--

"I should probably mention something right now before this story goes any further: my name is Theodora Grumman, and I am a liar." It's hard for Thea to write four truths a day in the notebook her mother gave her for the summer. Especially when her grandparents' house on the Jersey Shore is even more packed with family than usual, and her cousin Jocelyn won't leave her alone. Jocelyn just might be the world's neatest and nosiest seven-year-old, and she wants to know what's in Thea's notebook. But Thea won't tell anyone about the secret she has promised to keep--or how she lost her best friend (Truth #12), whose name was Gwen. Now Thea has to babysit in the afternoons, and all Jocelyn wants to do is spy on people. Neither of them expect to see Aunt Ellen and Aunt Celia at the boardwalk in the middle of the day,

or for their aunts to lie and insist they were at work. Could it be Thea's not the only one in the family keeping secrets this summer?
