Hi guys, long time no see. Still makin' chips, still having my way with machine controls, but this is a new one on me. The shop I'm working at has this old T32B that has some issues. I'm not sure what all is wrong with it, but I'm hoping we can figure it out. As of right now I get the 128 E-Stop alarm

# Online Library Mazak T32b Manual

upon start-up. I have no idea how to clear it besides reinitialising the control.
