~~RabiesAware.org~~

Most veterinarians have now changed to the non-adjuvanted form of the rabies vaccine for cats. Originally, this vaccine was only released as a one-year vaccine. That meant that starting at the age of 12 weeks, a cat would need to receive the vaccine annually to ensure protection from the disease.

~~What You Need to Know About Rabies Vaccines for Cats~~

IMPORTANT UPDATE ☐ October 2014: Merial has recently brought to market a new PureVax rabies vaccine that is non-adjuvanted and is labeled for 3 years versus their original (and still available) PureVax rabies vaccine that is labeled for 1 year. The 3-year product is the rabies vaccine that I strongly recommend.

~~Vaccines for Cats: We Need to Stop Overvaccinating~~

Currently there are 16 states distributing oral vaccines for raccoons in the U.S., while Texas distributes baits for gray fox and coyote. The ORV baits currently being used in the United States are developed and manufactured by Merial, Inc. and consist of a sachet, or plastic packet containing the Raboral V-RG® rabies vaccine.

~~USDA APHIS | Oral Rabies Vaccine and Bait Information~~

Rabies is the only vaccine that is required by law in the United States, as it is a fatal disease. It is also a zoonotic disease, meaning it can be transmitted from animals to people. 2 ☐ For the health of the general public and their pets, all pets must be appropriately vaccinated for rabies, according to state guidelines.
