Nanometer Technologies was born through research at NASA's Jet Propulsion Labs in Pasadena Ca. Our first product was a variable fiber optic attenuator. This attenuator was designed by Mike Buzzetti during the early 1990's. It was of the bent fiber type (light loss by bending of fiber) and was subsequently patented by Mike Buzzetti and CAL ...

Semiempirical models of MOSTs and inductors, obtained by simulation, jointly with analytical phase noise models, allow to get a design space map where the design tradeoffs are easily identified. Four LC-VCO designs in different inversion regions in a 90-nm CMOS process are obtained with the proposed methodology and verified with electrical simulations.
